

BANGLE SIZING GUIDE

METHOD 1 : MEASURE BANGLE CIRCUMFERENCE

Wrap a measuring tape or thin piece of paper around the widest part of your hand. Mark the meeting point of the tape or paper. Now measure the length, the same would give you the circumference of the Bangle.

METHOD 2 : MEASURE INNER DIAMETER

Using a pre-owned bangle to measure your perfect size is the best possible way to find your Bangle Size.

Place a ruler at the centre and measure the largest distance between the inner edges of the bangle. Ensure that you take accurate readings from the ruler.

Use the below given Bangle Size Chart to find out your Bangle Size.
